

MOTOR GRADER— SNOWPLOW

Course Overview The Motor Grader (MG) is typically used for both snow/ice control and snow removal operations. Operators require a wide range of knowledge and skill sets to use the MG and attachments effectively and safely at all times in different settings. The course includes both a classroom/theory (approx.7 hours) and a hands-on/practical component for the student operator at a venue within the Municipality.

Classroom Topics

The following topics are thoroughly covered:

- ▶ Due diligence
- ▶ Record keeping
- ▶ Pre-season preparation
- ▶ Weather and road weather
- ▶ Level of service
- ▶ Environment Canada's *Code of Practice*
- ▶ Anti-icing and deicing techniques
- ▶ Equipment operation & safety
- ▶ Attachment mounting and set-up
- ▶ Pre-trip inspection
- ▶ Plowing Techniques (all roadway configurations)

Practical/Hands-on Activities

- ▶ Pre-start inspection
- ▶ Controls review
- ▶ Winter operation procedures
- ▶ Maneuvering around obstacles
- ▶ Grader blade operation

- ▶ Snow plowing/removal
- ▶ Wing operations
- ▶ Articulation

NOTE: *Some of the above activities may not be covered, due to experience level as well as the amount of time available, weather conditions and availability of equipment.*

Who Should Attend: Experienced grader operators responsible for snow/ice control and snow removal operations.

Evaluation /Documentation: Theory test (multiple choice) and/or oral exam (by instructor) and/or practical test (on equipment). Each successful participant will be provided with a certificate of completion.

About the Facilitator: Developed and delivered to you by **Ground Force Training Inc.**
