

EXCAVATOR

LEVEL 2

Course Overview This course provides training on specific excavator operation and capabilities. Each operator will receive a combination of classroom/theory and practical/hands-on training.

Classroom Topics

- ▶ The one call system (best practices)
- ▶ Preparing the job
- ▶ Operating techniques
- ▶ Production & cycle times
- ▶ Machine setup
- ▶ Trench sloping procedures
- ▶ Digging technique

Hands-on activities

- ▶ Machine setup
- ▶ Trench sloping procedures
- ▶ Digging technique

Who Should Attend: Experienced operators who have previously completed the Excavator Level 1 program.

Learning Objectives: This course will help to increase the skill level of operators and help make them more aware of the machine's capabilities.

About the Facilitator: Developed and delivered to you by **Ground Force Training Inc.**
