

SUSTAINABLE TECHNOLOGIES EVALUATION PROGRAM (STEP) TRAINING

JOIN US AT TRIECA 2020

Canada's Premier Stormwater and Erosion and Sediment Control Conference

March 25-26, 2020

sustainabletechnologies.ca/events

The primary goal of the water component of STEP is to advance the knowledge and practice of urban runoff management through monitoring and evaluation of new and innovative water technologies and strategies. STEP courses are led by conservation authority staff members and industry professionals with practical experience designing, constructing, maintaining and monitoring sustainable technologies in Ontario.

STEP's series of professional development training opportunities are delivered on-line, in-class or in the field around the following core topics:

- ▶ Green Infrastructure and Low Impact Development
- ▶ Erosion and Sediment Control Certification and Field Training
- ▶ Healthy Soils
- ▶ Road Salt Management

Our training schedule is updated regularly. Please visit www.sustainabletechnologies.ca/wp/events/ for dates and a complete list of training opportunities.

For more information or to learn more about customized training, please contact Patricia Lewis at plewis@trca.on.ca.

About STEP Water:

The water component of STEP is a partnership between Toronto and Region Conservation (TRCA), Credit Valley Conservation (CVC) and Lake Simcoe Region Conservation Authority (LSRCA).

AORS members are eligible for a **20% DISCOUNT** on course fees. **Use coupon code AORS2020 when registering.**
