RIGGING AND LIFTING WITH HEAVY EQUIPMENT

Course Overview

This one-day course will cover the necessary safety requirements to properly:

- Rig loads for moving in and around the construction site
- Rig a load for lifting with heavy equipment
- Choose the right equipment for the right job, and
- Inspect equipment in order to ensure it meets the minimum safety requirements.

Classroom Topics

- Safety
- Hand signals
- Steel wire rope and chains
- Rigging inspection
- Stability when lifting

Field/Hands-On Activities

After the classroom portion, time will be spent performing various practices that will be customized to the specific equipment the Municipality/Company chooses to use.

Who Should Attend: Operators or supervisors who are involved in any type of rigging or recovery operations using heavy equipment.

Evaluation /Documentation: Written test, oral exam and/or practical assessment (on equipment). The employer will receive a certificate of completion and a summary of training for each participant who successfully completes the course..
